

CXQueue::enqueue_operation

CXQueue::enqueue_startall

Threshold::increment
_threshold

```
graph LR; A[CXQueue::enqueue_operation] --> C[Threshold::increment<br/>_threshold]; B[CXQueue::enqueue_startall] --> C;
```

The diagram illustrates a flow where two functions, CXQueue::enqueue_operation and CXQueue::enqueue_startall, both point to a common operation: Threshold::increment_threshold. The arrows are blue and point from the left boxes to the right box.
